

Peer review (part I)

Submit answers to these questions concerning your analysis report as a single page PDF-file through Aula Global. This submission makes up 50% of your peer-review grade.

Remember that your submission must be anonymous. That is: do not put any information that can identify you in the PDF nor in the name of the file (like your name).

1. What is your general research question?

My general research question is how many people in Catalonia consider themselves as bilingual people (Spanish and Catalan).

2. Why do you think this question is interesting? What does an answer to it tell us?

This is an interesting question because 80% (approx.) of people can speak Catalan, 50% (approx.) can speak in Spanish, but there's an unknown number about the percentage of bilingual people in Catalonia. The data from previous studies say that 6.8% of people can speak both languages and that Catalan and Spanish are both common languages for them.

3. What is your specific research question?

My specific research question is how many people are bilingual in Catalonia (objectively).

4. What kind of data would you use to address Question 2 if you had unlimited resources?

I would use data from previous studies with some graphics and brief explanations and then I would do a survey and send it to a lot of people that live in Catalonia to get the results related to my question.

5. What kind of data are you planning to use to address Question 2 within the scope of this class?

I'm planning to use some graphics of people who can speak both languages and other related graphics about Spanish and Catalan speakers.

- How will you obtain it?

Researching on Internet and doing a survey.

- How much will you collect?

As much as the survey expands throughout Whatsapp, Instagram, etc...

- Do you think that is enough data to address Question 2? Why (not)?

I don't think so because it would be necessary to ask some people on the streets to know more personally the answers for the data.

Elaborate with as much detail as you (currently) have. It is perfectly acceptable if you answer in bullet points and single sentences. A randomly selected peer will give you feedback on them
